

## Subject and Author index

Numbers refer to the page where a definition or explanation of, and/or a *figure* or a **table** for, a given subject is found. Author names are given with the number of the first page of the paper in which they are involved.

### A

Absorption spectra of gems, 352  
 Addis, A., 151  
 Agate, 31, **32**, 328, at Idar-Oberstein museum, 37, provenance in archaeometry, 37  
 Alteration mechanisms on pigments in Central Asian wall paintings, 310  
 Altered gems, 340  
 Amber, 337  
 Amethyst, 57, 327  
 Ancient route, reconstructed using obsidian, 404  
 Ancient Mediterranean polychrome stones, 367  
 Angelini, I., 87  
 Antiquity and Late Antiquity, 122  
 Aquamarine, 329  
 Archaeological, clay, composition, **249**, issues for copper slag formation, 217, materials, SR microspectroscopy of, 411  
 Archaeology, and pigments, 285, **288**, IR imaging in, 426  
 Archaeometallurgical studies of copper smelting, 208  
 Archaeometric problems with polychrome stones, 370  
 Archaeometry, gemmology and, 345, opal provenance in, 23  
 Artioli, G., 1, 87, 151  
 Atmosphere, of slag formation, 213  
 Attenuated total reflection geometry, 419, -FTIR point analyses for identifying paint cross-sections, 299

### B

Barca, D., 393  
 Beryl, 329  
 Binders, inorganic, classification of, 158, **160**  
 Blue glass, Egypt, 109  
 Blue quartz, 60  
 Bourgarit, D., 203  
 Brick, manufacture, Sudan, 155, walls, Sardinia, Italy, 156  
 Bricks, inscribed, Iran, 157  
 Bronze Age, 92, copper slag smelting, 218, Italian

vitreous materials, **91**, pottery, 258

Buckland, William, volume by, 4  
 Bucranium amulet, 93

### C

Calcareous illitic clay, phase stability in, 245  
 Carnelian, 328, black – onyx, 45, brown – sardonyx, 45, Cr-chalcedony, 46, gem silica, 46, heliotrope, 46, **47**, green – chrysoprase, 46, provenance in archaeometry, 43, red chalcedony, 39,  
 Carthaginian, glass pendant, 118  
 Catalogue of coloured stones, 372  
 Cathodoluminescence imaging, 164  
 Celadon-glazed porcelains, 162  
 Cement, hydration, 171, modern, development of, 177, **178**, modelling of microstructural evolution of, 184  
 Ceramic phase diagrams, 236, 238  
 Chalcedony, 328, 328, classifying, 14, **15**, distinguishing features, 23, formation conditions, 24, varieties, 38  
 Chalcolithic, copper slag smelting, 218, bulk chemical composition, 220  
 Chemical analysis, surface vs. bulk, 135  
 Chemistry, mineralogy, of vitreous materials, 87  
 Chert, 48  
 China, glasses from, 124, precious stones from, 326, porcelain, 265  
 Chrysoberyl, 335  
 Chrysoprase, 328  
 Cinque, G., 411  
 Citrine, 57, 327  
 Classification of obsidian, 394  
 Clay mortar, Turkey, 154  
 Clays, composition of, 256  
 Coesite, Raman spectroscopy, 30  
 Colourants, 285  
 Computed X-ray micro-tomographic image of a faience bead, Italy, 136  
 Concrete structures, 181  
 Conservation, and restoration, IR and SR in, 438, of binders, 186

Copper metallurgy, history of, 203  
 Copper smelting, 204, 206, 207  
 Corundum, 334  
 Counterfeit gems, 340  
 Crisci, G.M., 393  
 Cristobalite, Raman spectroscopy, 30  
 Cultural heritage, artifacts, microspectroscopy of  
 archaeological materials, 411, IR imaging in,  
 426, materials, 8

## D

Deffufa, Kerma, Nubia, 153  
 Demonic mask, Phoenecian glass pendant, 118  
 Desert glass, Libyan, 356, 357, **360**  
 Diamond, 334

## E

Earthenware, composition of, 252, 262, low-fired,  
 251, 254, medium-fired, 260,  
 East Asia, ancient, 326  
 Egypt, blue glass, 109, shrine elements, 121  
 Egyptian blue, lion, jar, 106  
 Electron micrographs of layers of paint, 298  
 Ellora caves, kemp-loaded lime, 169  
 EPMA, technique for investigating glass, 132  
 Equilibria, micro- or local?, 242, 244  
 Ettringite, Portland Cement, 180  
 EXAFS, technique for investigating glass, 132

## F

Faience, **91**, activity in Bronze age Egypt and Near  
 East, **102**, beads, 100, bowl, 99, collar and  
 button, 105, computed X-ray micro-tomo-  
 graphic image of, 136, hippo, 100, ornament,  
 99  
 Fake gems, 340  
 Fayalite habits in Bronze Age Trentino smelting  
 site, 221  
 Fayum, mummy portrait, 283  
 Fired-brick dome, India, 169  
 Firing, oxidizing vs. reducing, 245  
 Flint, 48  
 Fluorite, 335  
 FTIR, of archaeological materials, 414, spectrum,  
 pigment, 293

## G

Garnet, 330  
 Gemmology and archaeometry, 345  
 Gems and man, 323  
 Geography of gem deposits, 340

Geology of gem deposits, 340  
 Glass, beads, Italy, 113, bottles, Egypt, 109, from  
 India and China, 124, Late Helladic III, 111,  
 techniques for investigating, 131, textures, **91**,  
 through history, 87, -ribbed bowl, Late  
 Hellenistic, 120  
 Glass-making transition, beginning of the first  
 millennium BC, 125, end of the first  
 millennium AD, 127  
 Gliozzo, E., 13  
 Goldstone, 89  
 Gratuze, B., 87  
 Greece, glass-ribbed bowl, Late Hellenistic, 120  
 Guan stoneware dish, 267  
 Gustave Courbet painting, two underlying compo-  
 sitions, 315

## H

Hard-paste Meissen porcelain, 271, 272  
 Heimann, R.B., 233  
 Heinrich von Tebra, F.W., volume by, 3  
 Hellenistic, Late, glass-ribbed bowl, 120  
 History of gems, 323  
 HMG blue bead, 113  
 Hyaline quartz, 53  
 Hydraulic mortars, 170

## I

ICP-MS, technique for investigating glass, 132  
 Illitic clay, phase stability in, 245  
 INAA, technique for investigating glass, 132  
 IR, microspectroscopy of archaeological materials,  
 411, 418, spectra, silver degradation area in  
 altarpiece painting, 431, spectral quality,  
 conventional vs SR-IR, 420  
 Iron Age, 116  
 Iron Crown, 350, 352, 353, 354, **355**  
 Italy, provenancing of archaeological obsidian in  
 Neolithic sediments, 399

## J

Jade, 331  
 Japan, precious stones from, 326  
 Jasper, 48, 339  
 Jet, 338

## K

King Tutankhamun's pectoral, 88, 356  
 Knossos, Crete, 166

**L**

- Lapis lazuli, 313, 332  
 Lazzarini, L., 367  
 Le Corbusier, architect, 181  
 Libyan desert glass, 356, 357, **360**  
 Lime-based binders, 161, 163, throne room of King Minos, 166  
 Lipari, Italy, obsidian and volcanic glass from, 395

**M**

- Macro-XRF Hg L mapping, 304  
 Maggetti, M., 233  
 Magnetic susceptibility of calcareous illitic clay fired under reducing and oxidizing compositions, 249  
 Malachite, 336  
 Manganese oxides used for Palaeolithic cave art, Dordogne, France, 306  
 Marcelli, A., 411  
 Materials of historical interest, IR in, 424  
 Maya blue pigment, 296  
 Mediterranean, obsidian, 395, composition of vitreous materials from, 92  
 Meissen porcelain, 271  
 Mesoamerica, obsidian in, 400, 403  
 Michelson interferometer, 416  
 Micro-Raman spectrum, pigment, 294  
 Micro-tomography, 136, 184  
 Micro-XRF spectrum, pigment, 295  
 Middle Ages, early, 123  
 Milky quartz, 53  
 Mineral pigments, 283  
 Mineralogy, of slags, 203  
 Minoan (Bronze Age) pottery, 258  
 Miriello, D., 393  
 Modern mineralogy, 1  
 Modern period, 124  
 Moganite, 26, XRD, 29, Raman spectroscopy, 30  
 Mortars, and binders, 151, ancient, composition of, 161, CL image of, 164, natural hydraulic lime, 176  
 Moulded glass, Late Helladic III, 111  
 Mud-brick Qubba (domed mausoleum), Dongola, Sudan, 153, wall, Catalhoyuk, Turkey, 154

**N**

- Natural hydraulic lime (NHL) mortars, 176  
*Naturalis Historia*, 22, 325

**O**

- Oberti, R., 1  
 Obsidian, 339, and volcanic glass shards, 393, black, 88  
*Old Testament*, minerals of, 326  
 Opal, 332, 333, classifying, 14, **15**  
 Opalite, 332  
 Optical, images of inclusions in gems, 351, micrographs, pigments, 292  
 Oxidizing vs. reducing firing, 245

**P**

- Paint, 285  
 Palaeolithic cave art, France, 306  
 Palmarola, Italy, obsidian and volcanic glass from, 395  
 Pantelleria, Italy, obsidian and volcanic glass from, 395  
 Pb glass, deep focus image, Egypt, 136  
 Pearl, 337  
 Pectoral, King Tutankhamun's, 356, 358  
 Phase stability in calcareous illitic clay, 245  
 Phoenecian glass pendant, 118  
 PIGE, technique for investigating glass, 132  
 Pigment, in paintings, 297, mineral, 283  
 Pink quartz, 56  
 PIXE, technique for investigating glass, 132  
 Pliny, on agate, 34, on amethyst, 58, on blue quartz, 61, on chert, flint and jasper, 51, on gems, 326, on green chalcedonies, 47, on opals, 21  
 Polychrome stones, ancient Mediterranean, 367  
 Porcelain, high-fired, 265, triaxial, reaction scheme of formation of, 273  
 Portland clinker, 178  
 Portlandite, 180  
 Pottery, Bronze Age, 258  
 Pozzolans, 170  
 Prasiolite, 57  
 Process duration, slag formation, 213  
 Prosperi, L., 345  
 Provenancing of obsidian and volcanic glass shards, 393  
 Ptolemaic period, Egypt, shrine elements, 121

**Q**

- Qing Dynasty, China, 89  
 Quartz, family minerals, 327, varieties, classifying, 14, **15**, Raman spectroscopy, 30

**R**

- Raman spectra, image of yellow glass bead, 135  
Raman spectroscopy, tridymite, 30  
Rapp, G., 323  
Reaction scheme of formation of triaxial porcelain, 273  
Reiche, I., 283  
Riccardi, M.P., 345  
Roman world, 151  
Rose quartz, 56  
Ruby, rutile inclusions in, 351  
Rutile, inclusions in ruby, 351

**S**

- Sapphire, rutile inclusions in, 351  
Sard, orange chalcedony, 39  
Sardinia, Italy, obsidian and volcanic glass from, 395  
Secco, M., 151  
Seftonite, 47  
SEM, -EDX, technique for investigating glass, 132, image of glass (Etruscan blue-green), 133, image of yellow glass bead, 135  
Serpentine dish, 324  
Shell, 338  
Silica, -based glass, compositional groups of archaeological and historic, 94, dissolution and precipitation, 18, theme, 13  
Silver degradation area in altarpiece painting, IR spectra, 431  
Slags, mineralogy of, 203  
Smoky quartz, 53  
SR-FTIR images, 429  
SR-IR images, 427, of a Buddhist mural painting, 434  
Steatite, 93, 97  
Stones, Ancient Mediterranean polychrome, 367

- Stoneware, high-fired, 265  
Study protocol, gemmology and archaeometry, 349  
Stupa, Sanchi, India, 169  
Synchrotron radiation infrared microspectroscopy of archaeological materials, 411, 418

**T**

- Tarantino, S.C., 345  
Temperature of slag formation, 212  
Terra Sigillata ceramics, 261  
Thai stoneware, 269, chemical composition of, 270  
Theophrastus, 325  
Thermodynamics and kinetics, ceramics, 233  
Topaz, 330  
Tourmaline, 329, 331  
Traditional vs. modern mineralogy, 1  
Transmission reflection geometry, 419  
Tridymite, Raman spectroscopy, 30  
Turquoise, 336  
Tyrrhenian, obsidian, 395, 396, 399

**V**

- Vitreous materials, through history, 87  
Vitruvian, legacy, 151, recipes, 170  
Volcanic glass shards, 393

**X**

- XANES, technique for investigating glass, 132  
XAS, technique for investigating glass, 132  
XRPD patterns, of cement paste, 183, of Maya blue pigment, 296

**Z**

- Zema, M., 345  
Zircon, 330
